

### Responsible Use of the Computer & Internet Agreement

Computers and the internet are an important and useful educational tool in the lives of today's learners. In order that their use is valuable and appropriate, they must be used in a responsible and safe way. For these reasons, the following Rules and Responsibilities must be agreed to and signed by all pupils and their parents/guardians.

	<p><b><u>I must always ask for permission from my teacher</u></b></p> <p>I will always wait for my teacher to tell me when I can use the computer I will not use the computer at playtime, lunchtime or after school without permission. I will always ask permission when I am using the printer so that I do not waste paper or ink. I can use the computer at Golden Time but only use programs and websites allowed by my teacher.</p>
	<p><b><u>I will always work responsibly</u></b></p> <p>I will only use the school's computers for schoolwork. I will always tell the teacher when I am changing the programme or something happens to the computer. I will always let my teacher know if I see something on the computer that upsets me or I do not like. I know that the school and the Education Authority can check what I have been using the computer for. I understand that I may no longer be allowed to use the school's computers if I break these rules.</p>
